

ABSTRACT

Steganography refers to data that is hidden within a virtual image, video, document object. Textual content steganography, image steganography and audio/video steganography are some of the types of steganography. Picture steganography is famous amongst all of these methods. It is a method used to hide the data inside a picture. The Least Significant Bit (LSB) method is one such method in which the least bit of the picture's pixel is replaced with a ASCII bit of hidden data. Our goal here is to hide the sensitive data and secure up the data.

ACKNOWLEDGEMENT

The satisfaction and euphoria that accompany the successful completion of any task would be incomplete without the mention of the people who made it possible, whose constant guidance and encouragement crowned our effort with success. I express my sincere gratitude to our Principal **Dr. H. C. Nagaraj**, Nitte Meenakshi Institute of Technology for providing facilities.

We wish to thank our HoD, **Dr. Mohan S. G.** for the excellent environment created to further educational growth in our college. We also thank him for the invaluable guidance provided which has helped in the creation of a better project.

I hereby like to thank our ***Mr. Prashanth B S, Assistant Professor*** Department of Information Science & Engineering on their periodic inspection, time to time evaluation of the project and help to bring the project to the present form.

Thanks to our Departmental Project coordinators. We also thank all our friends, teaching and non-teaching staff at NMIT, Bangalore, for all the direct and indirect help provided in the completion of the project.
